

Richter and Allergan Announce FDA has Extended the Review Period for Cariprazine to September 2015

BUDAPEST, Hungary and DUBLIN, Ireland – 16 June 2015 - Gedeon Richter Plc and Allergan Plc (NYSE: AGN) today announced that the U.S. Food and Drug Administration (FDA) notified the companies that it will require a three-month extension to complete its review of data supporting the resubmission of the New Drug Application (NDA) for cariprazine. Cariprazine is being reviewed for the treatment of schizophrenia and for the acute treatment of manic or mixed episodes associated with bipolar I disorder in adults.

The FDA has determined that a recent response to an FDA question about the cariprazine NDA is a “major amendment”, requiring the three-month extension.

"We continue to work with the FDA during their review of the cariprazine NDA. The unmet need of patients suffering with bipolar I disorder and schizophrenia continue to be of paramount importance to Allergan and Richter. We remain committed to pursuing this important treatment option for patients and physicians," said David Nicholson, Executive Vice President, Global R&D of Allergan.

About cariprazine

Cariprazine, an investigational drug is an atypical antipsychotic for the treatment of patients with schizophrenia and for patients with manic or mixed episodes associated with bipolar I disorder. The safety and efficacy of cariprazine was studied in a clinical trial program of more than 2,700 patients. In addition, cariprazine is being investigated for the treatment of bipolar depression and adjunctive MDD in adults. Cariprazine was discovered and co-developed by Gedeon Richter Plc and is licensed to Actavis, now Allergan, in the U.S. and Canada.

The NDA for cariprazine was submitted in late 2012. The agency issued a complete response letter (CRL) in November 2013, and the companies resubmitted information in December 2014.

About Allergan

Allergan Plc (NYSE: AGN), headquartered in Dublin, Ireland, is a unique, global pharmaceutical company and a leader in a new industry model – Growth Pharma. Allergan is focused on developing, manufacturing and commercializing innovative branded pharmaceuticals, high-quality generic and over-the-counter medicines and biologic products for patients around the world.
